

**A CONNECTED ECOSYSTEM  
POISED TO CHANGE THE  
LIFE SCIENCES INDUSTRY.**

Dassault Systèmes is leading the way in driving transformative change, unlocking new possibilities for Life Sciences companies and patients everywhere. Bringing together a connected ecosystem of best-in-class technologies with deep scientific expertise from across the entire lifecycle, Dassault Systèmes is poised to get breakthrough therapies and devices into the hands of patients faster.

From research to commercialization, we are breaking down data silos to help you illuminate insights, mitigate risk and accelerate progress. Through continuous innovation, groundbreaking virtual twin technologies, and a patient-centric mindset we are moving the industry forward in ways far beyond clinical trials. Partnering together with you, we will keep pushing past every barrier, to find new and better ways to improve the quality of life.

## Customer Benefits

### One Connected Ecosystem

Have full visibility of all processes on a single, interconnected platform.

**Did You Know?**

Dassault Systèmes is a leader across multiple Life Sciences domains with approximately 65% of new approved drugs and 50% of medical devices designed using our platform.

### Reduced Costs and Risk Mitigation

Do more with less - feel confident investing in solutions designed to help your resources have greater impact.

**Did You Know?**

Dassault Systèmes has the deepest expertise in R&D, engineering, lab execution, and data driven quality with a team of over 225+ Scientists and PhDs ready to help you contain costs, reduce risks, and get to market faster.

### Increased Productivity and Efficiency

Enhance productivity with an end-to-end portfolio of solutions and enterprise-wide capabilities.

**Did You Know?**

Validating manufacturing with 3D and virtual simulation in the industry leads to 38% reduction in time to market, 35% fewer prototypes, and 34% less Engineering Change Orders (ECOs).

### Sustainability

Ensure quality and sustainable efforts at every stage, not just within each individual point solution.

**Did You Know?**

Remote monitoring lessens emissions by reducing travel, with an average of 3.4 less on site visits per month. The majority of site monitoring visits via a CRA involve 6+ hours of transport.

## VALUE ACROSS THE LIFECYCLE

Only Dassault Systèmes offers a connected ecosystem of best-in-class technologies, designed with our customers in mind.

Powered by deep scientific expertise – from research to commercialization, this connected ecosystem enables you to reduce costs, increase efficiencies, improve quality, mitigate risks, and enrich the lives of patients globally.
