

RAVE LITE

Simplified and Accessible Solution for Early-Stage and Late-Stage Trials.

Medidata understands firsthand that different trials require different solutions. To better suit the nuances of each trial's budget and requirements, Medidata offers a new approach to addressing the specific needs of each study.

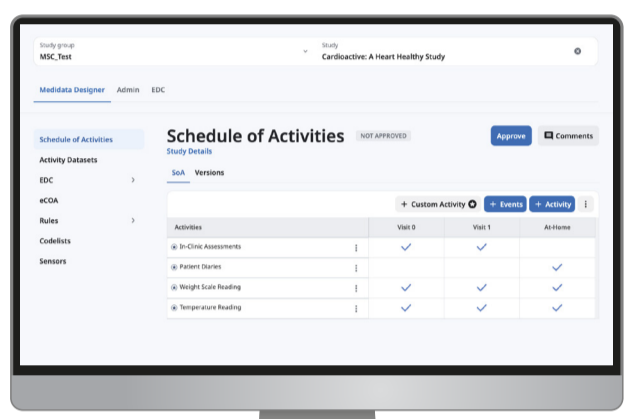

With Rave Lite, Phase I and Phase IV studies gain an efficient electronic clinical data capture, management, and analysis solution with a tailored pricing model—regardless of company size, therapeutic focus, or pipeline.

RAVE LITE SUPPORTS

- ✓ Rave for Early-Stage Trials
- ✓ Rave for Late-Stage Trials
- ✓ Emerging MedTech

Rave Lite

Rave Lite is a cost effective and focused version of Rave EDC that supports data capture, data management, and basic data analysis for Phase I and Phase IV studies.

Recognized as the industry leader in Everest Group's 2024 Peak Matrix Life Sciences Electronic Data Capture.

Benefits for Phase I and Phase IV Trials

Pay Only for What You Need

Invest in technology designed to meet varying requirements. Medidata provides expert solutions, customized for each trial, delivered when and how they're needed.

Streamline Study Build

Build studies faster and more accurately using a pre-configured, pre-validated, and accelerated implementation.

Affordable Scalability, Superior Functionality

Benefit from Rave EDC's essential capabilities for your unique trial needs. Medidata can scale and pivot as your studies grow.

Differentiators and Advantages

 Simple contracting process	 Quick study build	 Limited custom functions	 Light touch services
--------------------------------	-----------------------	------------------------------	--------------------------

Experience Accelerated Study Timelines

 1 MONTH FASTER STUDY BUILD When using Medidata Professional Services ¹	 5 MONTHS FASTER CONDUCTING STUDIES When using multiple products ²	 4 DAYS FASTER TO DATABASE LOCK When using multiple products ³
