Medidata Clinical Data Studio December 2024 Release Training
eLearning Course Outline

Course Description:

The Medidata Clinical Data Studio December 2024 release includes:

Data Connect

Dataset Activation

Data Profiling

SDTM Dataset Generation

Improved Dataset Page

Enhanced Enriched View/Unit Conversion

Field Transformation

Third-party EDC data imports

Direct Connect with an external EDC vendor

Data Surveillance

Patient Profile Comments

Patient Milestones for third party

TSDV counts in Clean Patient Tracker

Published audit datasets are available in Listings and Data Sets

UI/UX enhancements of the Clean Patient Tracker

RBQM

Audit Trail Review

Integrated Data Quality Plans

Review process when creating Issues

Improved risk level view

Enhanced Actions and Mitigations Documentation

Cross Study Analytics

Cross Study Metrics for KRIs, QTLs, and Clean Patients

<u>Approximate Duration</u>: 25 minutes

Module	Topic
Data Connect	● Dataset Activation ● Data Profiling ● SDTM Dataset Generation ● Improved Dataset Page ● Enhanced Enriched View/Unit Conversion ● Field Transformation ● Third-party EDC data imports ● Direct Connect with an external EDC vendor
Data Surveillance	● Patient Profile Comments ● Patient Milestones for third party ● TSDV counts in Clean Patient Tracker ● Published audit datasets are available in Listings and Data Sets ● UI/UX enhancements of the Clean Patient Tracker
RBQM	● Audit Trail Review ● Integrated Data Quality Plans ● Review process when creating Issues ● Improved risk level view ● Enhanced Actions and Mitigations Documentation
Cross Study Analytics	● Cross Study Metrics for KRIs, QTLs, and Clean Patients
